REASONS FOR ALLOWANCE

1. This is an Examiner's statement of reasons for allowance. The prior art of record He et al (U.S. Pat. No. 6,088,451) discloses a system/method for securing access to network elements by user elements, wherein the network elements and the user elements are coupled to a network.

Steele Douglas JP411338824A discloses a high-grade security in the case of accessing a web resource on a by a client system

However, neither He nor Steele singularly or in combination fail to anticipate or render obvious the recited feature:

As per claims 1, 9 and 10 " wherein if the user selects an insecure site while logged on to the secure site on the server, the notification module sends a warning notice to the user to alert the user of an impending logoff from the secure site, and further sends a termination command to the secure transaction protection module for implicitly logging off the user from the secure site; and wherein the secure transaction protection module causes the session to be terminated in response to the termination command, absent an instruction from the user to maintain a connection with the secure site".
